

# Snowman Instructions

Victor 11A

1. First, make the background purple (violet #660099).
2. Then, use a square, make it white, and put it all across the ground (1inch from the ground so it looks like snow (from one side of the page to the other).
3. Next, use white circles as skinny, skinny ovals and to build up a pile of snow on the left side of the page.
4. For the snowman: make one circle on the bottom 2 ½ in. horizontally and 1 in. vertical (oval shaped). Make the middle one on top of the first 1½ in. diameter so it is circle shaped but overlapped a little bit on top of the bottom oval.
5. Make the last one 1 in. diameter and stack them so it looks like a neat snowman's body.
6. Then, put the line width to three and make a line going up on the right side of the middle ball ¾ and inch and the sticks coming out at the end very small to where it looks like fingers. You've made his right arm and hand. Do the same on the left side of the middle ball to make the left arm and hand.
7. Next, make a three inch circle horizontally and vertically and make it a dirty white and make it stick in the top left corner of the page (make it so only ¼ of it shows). Then, put grey circles (small about ¼ in. diameter) for craters. This is the moon shining down on the snowman.
6. On each side of the snowman, there will be a tree. Next, put the linesize of stick in the shapes section to 72 (tree bark brown color)and draw a vertical rectangle from the bottom of the page up on each side of the snowman to make tree trunks. Also put leave green circles on the trees to make their tops.
7. Finally, put a face on the snowman. Go to stamps and click sunglasses and make them light blue and put them where his eyes would go.
8. Then go to shapes and click circle and make 3 circles about the size of an eraser on a pencil. Place them down the snowman's chest for buttons.
9. Then get the cone shape and make two, one black and one orange, use the orange one to make a carrot nose pointing to the right on the top of the snowman, the black one will be used for a mouth, and if you follow these instructions you will make a perfect snowman.
